

# 1

## How to use

- Zip file contains PSD file
- All layers are organized to the folders
- Click on smart object's to change design
- After making changes to the smart object design go to **File > Save** , and open back main window, item will be updated automaticly

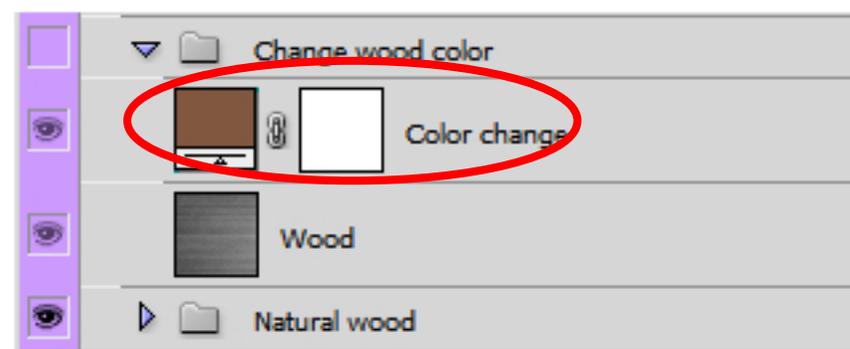

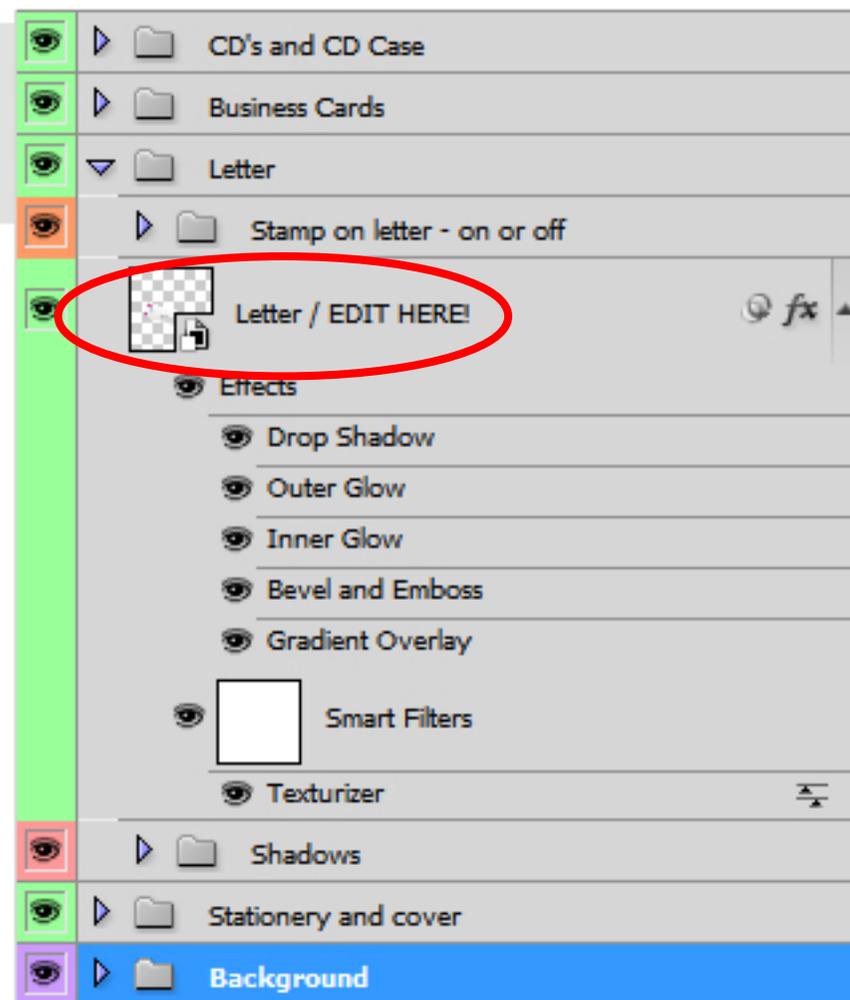

For faster manipulation you can use auto-select:

You can also change colors of wood background by chaging layer color as you can see on image.

Fonts used are **Droid Sans**, and **Droind Sherif** witch can be found at <http://www.fontsquirrel.com>

These fonts are also on google font directory, you can use them directly at website with Google font javascript.
